INTRODUCTION

Precious metals have always been a reliable and famous way of accumulating wealth assets. Gold had always a significant role since ancient times in either a currency of exchanged values or a way to preserve one's wealth. In modern times, several companies and banks own a tremendous amount of gold and other precious metals, where as also the means of productions and resources, which in that case is mostly either land and machinery, plus mining facilities (not rigs). Furthermore, after the industrial revolution fewer and fewer people take advantage of owning such precious metals.

PROBLEM STATEMENT

Undoubtedly, cryptocurrencies and blockchain technology will have a huge impact in our societies the following decades. There is a natural gap being created between common wealth management methods, cryptocurrencies and of course traditional businesses, and start-ups! Efficient solutions must be found in order to better coordinate the above parameters, so that more entrepreneurs can benefit from the ongoing rapid growth of technology, plus having access to large amounts of capital flow or wealth assets.

SOLUTION

Venethor provides a holistic solution to the aforementioned problems. One can imagine VNTR at the epicenter of a spider web. Venethor is a flexible organization which aims to be connected and focused in the following directions:

- ✓ Behave as native token @Cryptoplanex.com
- ✓ Instant liquidity provision for our clients through many trading pairs to VNTR.
- ✓ Invest in precious metals such as: gold, platinum, palladium, lithium.
- ✓ Participate in equity based deals regarding global patents.
- ✓ Fund start-ups at a co-founding basis, especially within the crypto ecosystem.
- ✓ Development of an e-bank, with a crypto2fiat debit card based on your VNTR.

OPPORTUNITY FOR COMPANIES AND CORPORATIONS

A tax haven is generally defined as a country or place with very low "effective" rates of taxation for foreigners. Traditional tax havens, like Jersey, are open about zero rates of taxation, but as a consequence have limited bilateral tax treaties. Modern corporate tax havens have non-zero "headline" rates of taxation and high levels of OECD-compliance, and thus have large networks of bilateral tax treaties. However, their base erosion and profit shifting ("BEPS") tools enable corporates to achieve "effective" tax rates closer to zero, not just in the haven but in all countries with which the haven has tax treaties; putting them on tax haven lists.

According to modern studies, the top 10 Tax Havens include corporate-focused havens like Ireland, the Netherlands, Singapore, and the U.K., while Switzerland, Luxembourg, Hong Kong, and the Caribbean (the Caymans, Bermuda, and the British Virgin Islands), feature as both major traditional tax havens and major corporate tax havens. Corporate tax havens often serve as conduits to traditional tax havens.

Venethor will redefine that term and "digitalize" it enabling companies and corporations to enjoy the benefits of one whilst promoting global growth. Tax havens are mostly successful and well-governed economies, and being a haven has often brought prosperity. In this era of transition, such advantages should be accessible to anyone. Research suggests that perceived issues in the tax regimes of higher taxed nations can be solved and economic growth can be observed

**50%
BUY BACK**

Working with Venethor Investments LTD, corporate clients have the ability to effectively use VNTR as "wealth storage", considering the fact that our project has one of the most generous buyback programs, with over 50% of the profits being used to accumulate and hold Venethor coin at a stable price, on a quarterly basis.

OPPORTUNITIES FOR USERS

By implementing blockchain, we're not really trying to "fix" everything. In-game currencies and items aren't necessarily broken, but they would be improved if they were decentralized, secure, and managed by the community.

Cryptocurrencies will be the future store of value due to the inflationary principles of the current economic crisis. Venethor will be a widely accepted coin across Cryptoplanex, its E-bank and other major businesses, providing users with a single currency to be used across your favorite platforms or to be stored as an investment.
